

Use Spotify & Airplay on Stream Box

Get Airplay functionality for Stream Box

- Install MusicFlow App from iTunes Store (€ 2,69)
- Playback of music stored on iOS devices (iOS 6.0 or higher)
- Playback of music from streaming platforms (Spotify, ...)
- Built-in Features:
 - Skip/Forward & Volume controls
 - Landscape layout
 - Swipe Album cover to go through playback history
 - Tap the Album cover to quickly select music from library

Installation of „Music Flow“

- 1) Install MusicFlow, available from App-Store.
- 2) After start up of App leave it in the back by pressing Home button and start your app for music playback.
- 3) If Pro-Ject Stream Box is within same network, your Stream Box will be listed as playback target (see screenshot).
- 4) Now you are able to play music on your Stream Box, that is stored locally on iPod Touch, iPad or iPhone or originates from streaming services like Spotify!
- 5) Because of buffering the signal, the audio signal heard on your Stream Box may come with a short delay!
